

Working in a forest clearing

Wood harvested from the trees of our own forest Giebinger Forst provided the material for the creative analogue equipment: With the help of mobile walls, stools and workstations scattered around, individual group spaces are created in no time. Together with *cannyboard*, the digital "all-in-one" collaboration solution, the room offers ideal conditions for interactive and hybrid workshops.

Recommended for

Creative seminars, hybrid events, human resource development and coaching

Method

Design Thinking, Barcamp, World Café
